## Education

### Notable Projects.....

- **Masters Project (Ongoing): 'Development of an Intelligent Humanoid Robot'**  
I am part of a team developing a 5ft autonomous humanoid robot. This ambitious project requires strong team-working skills and high technical ability. I work well as part of the team, contributing in group discussions and taking initiative to set myself tasks when the next stage of the project is not clear. Given the role of electronics supervisor I am responsible for setting goals and ensuring all the electronic system designs are realised on time and meet the specifications of the project.
- **3rd year individual project: 'Artificial Neural Network Approach to Source Localisation in Radiation Portal Monitoring'**  
This challenging project took place over the entirety of my third year. It required excellent planning and organisational skills, and the ability to teach myself an entirely new and complex subject. The project was a success, with the system being able to localise a radioactive source down to 3cm within a 600m<sup>3</sup> sensor array. This project has been suggested for publication by my supervisor.
- **Industrial Project with Leyland Motors Ltd: 'Development of a Facility to Ensure the Achievement of Torque Parameters for a Specific Axle Configuration'**  
In the 3rd year of my course I spent a week completing an industrial project for Leyland Motors. I worked with a team operating as consultants for a particular problem the company was having. During this project I was working in a professional environment, and co-operating with various managers and engineers to

create a design that met the requirements of the problem.

## Previous Employment

---

- **Eurogold Groundworks and Civil Engineering** **Moston**  
*Construction Site Operative* *July 2013–August 2013*  
I was responsible for the administrative duties and the tidiness and general order of the site. I worked in a safety-oriented manner, often working alongside construction plant and machinery. At the end of my work with the company my colleagues praised my work ethic.
- **Lavender Best Western Park Hall Hotel** **Charnock Richard**  
*Waiter, Catering and Banqueting* *2009–2011*  
I worked for three years as a team leader providing silver service at weddings, stag/hen nights, and business conferences. I was often trusted with other jobs such as setting up conference rooms, moving beds around the hotel, and guiding big groups of customers to their rooms. As a team leader I would delegate tasks to a team of about 5 people, often new staff who needed training, and lead the group to service. During this time I worked in a highly professional manner and was focused to provide excellent customer service, even during high stress functions and events.
- **Ryan Electricals** **Southport**  
*Assistant Electrician* *January 2008*  
I spent a week working as an assistant electrician as part of my high school work experience. My roles included wiring plugs, tidying, and assisting with household electrical repairs and fittings.

## Technical and Personal skills

---

- **Programming Languages:** Proficient in: C, C++, Python, Matlab, Arduino, TeX  
Also basic ability with: Assembly, VBA, VHDL.
- **Industry Software Skills:** SolidWorks (Advanced), Matlab (Advanced), Ansys (Intermediate), LTspice (Intermediate), Most MS Office products including MS project and MS access (Advanced).
- **General Business Skills:** Good presentation skills, Works well in a team.
- **Other:** Good soldering and spot welding skills, Can write well organised and structured reports.

## Interests and extra-curricular activity

---

- I was a "fresher representative" in my 2nd and 3rd years of university, this required me to guide, look after, and ensure that a particular flat of first years have a good time in their first week, and feel consoled in what for most of them is their first time living away from home. We were responsible for the safety and wellbeing of the group of first years during the first week, and during this time I made good friends with all of them.
- I am a member of a number of university societies. I was also the vice president and co-founder of the flash mob society. My roles in this included recruiting members, in which during "fresher's fair" we enlisted over 200 new members. This was regarded as very successful, considering other societies averaged around 50. I also appeared in an interview on the university television station, set up a society bank account, and helped organise the events. One of these events was featured in the local newspaper.
- I am also an avid hiker, having completed the national 3 peaks challenge last summer. Other interests include guitar, which I am self-taught, and home brewing.
